Trans. of Sovetskaya Etnografiya (USSR) 1960, no. 1, p. 72-82

DESCRIPTORS: *Anthropology, *Polynesia, Culture, *Translations

The aim of this article is to prove that there were not two different peoples on Easter Island. The division into short-ears and long-ears is a division between two groups of the same people. The evidence in favor of this statement is from a small "kohau rongo-rongo" text deciphered by the author. This text is inscribed on the small Chile table and represents a genealogy consisting of six names. (Author)
